## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 4-9, 11-16, and 18-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Tajima (US Pat. No. 6,928,231).

3. Consider claim 1. Tajima teaches a system for video content-based selection of programming for recording comprising: a connection for receiving broadcast programming (col. 5, lines 39-43); and an image processor comparing a demodulated field from the received broadcast programming to a template defining characteristics of video content desired to be recorded and saving the

Art Unit: 2616

field in response to determining at least a threshold level of similarity between the field and the template (col. 5, lines 52 – col. 6, line 24).

4. Consider claim 2. Tajima teaches that the template defines color characteristics and spatial distribution of regions to be compared to the demodulated field for determining a level of similarity (col. 9, lines 45-64; col. 6, line 38 – col. 7, line 14).

5. Consider claim 4. Tajima teaches that the image processor continuously compares demodulated fields for a selected channel to the template (col. 5, lines 52 – col. 6, line 24).

6. Consider claim 5. Tajima teaches that the image processor compares demodulated fields for a selected channel to the template during a predefined period (col. 9, line 65 – col. 10, line 43).

7. Consider claim 6. Tajima teaches that the image processor compares successive demodulated fields to the template and saves all demodulated fields having at least the threshold level of similarity with the template together with associated audio (col. 5, lines 52 – col. 6, line 24).

8. Consider claim 7. Tajima teaches that the image processor compares demodulated fields for a plurality of channels each to a designated template from one or more templates (col. 5, lines 52 – col. 6, line 24).

9. Claims 8, 9, 11-16, and 18-22 are rejected for the same reasons as discussed in the corresponding system claims above.

Art Unit: 2616

***Allowable Subject Matter***

10. Claims 3, 10, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mishawn N. Dunn whose telephone number is 571-272-7635. The examiner can normally be reached on Monday - Friday 7:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on 571-272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
